ABOUT US

In the marble sector we entered in 2006, we started production in 2011. We have increased our annual production capacity of 54,000 m² in 2018, in 1200 m closed and 20,000 m² open area, to which we moved, with new technological machinery, to 96,000 m²

We do 60% of our production by exporting to 8 countries, and by expanding our sales chain with 8 leading dealers in the domestic market.

With our 17 years of experience by adding the quality of the products it produces, dead- lines and innovations, it has become the only ISO 9001 certified company in Turkey in order to contribute more to the sector. WE ARE RIGHT TO RECEIVE ISO 9001 FOR THE 4TH TIME

As Yakmer Marble; In order to do the best in its job, I have switched to working with a full technological system from 2022 with the aim of sharing the pride of being the only company with an analysis report and ISO 9001 certificate in Turkey with its customers.
